(54) Title: GOLF TEE

(57) Abstract: A golf tee comprising a shaft, a stopper portion disposed at an upper end of the shaft and a pivotable support portion mounted atop the upper end of the shaft is described. The shaft is adapted for insertion into a surface of ground. The support portion has a plurality of prong members mounted upon an upper horizontal surface thereof. The position of the support portion can be adjusted so that the upper surface of the support portion is arranged in parallel horizontal alignment with the ground surface. The prong members are adapted to support a golf ball placed thereupon.
